## EDUCATION

### Stony Brook University

B.S. in Computer Science and Applied Mathematics & Statistics

May 2025

GPA: 3.96

**Awards:** 3 Hackathon Wins (HackHarvard '24, SBUHacks '24, HopperHacks '24), University Scholar, 6x Dean's List

**Relevant Coursework:** Software Engineering, Computer Networks, Offensive Security, Systems Fundamentals, Algorithm Analysis, Linear Programming, Statistics, Probability Theory

## TECHNICAL SKILLS AND INTERESTS

**Languages:** Python, JavaScript, TypeScript, Java, C#, C, HTML/CSS, SQL

**Libraries/Tools:** Git, Next.js, React.js, Pandas, Node.js, ASP.NET, Tailwind CSS, Angular, AWS, Terraform, Docker

## EXPERIENCE

### Software Engineer

North Atlantic Industries

Bohemia, NY

May 2025 – Present

- Developed a Java-based wave picking Android app used by 7 warehouse workers to process 20+ production orders daily, optimizing picking routes and implementing barcode scanning to reduce incorrect container errors to zero.
- Deployed an ASP.NET Core API interfacing with SQL Server to automate inventory synchronization with Microsoft Dynamics AX, eliminating manual data entry and ensuring real-time accuracy with full undo capability.
- Architected and deployed a development environment using Terraform and Docker, provisioning AWS infrastructure including ECS, ALB, and CloudFront with Jenkins CI/CD pipelines for isolated testing before production.
- Designed a full-stack Angular/ASP.NET dashboard managing IPC certifications for 75 employees, integrating AWS S3 for storage and automating Jenkins email reminders to ensure compliance.
- Developed a kit management dashboard that earned honorable mention at a company-wide hackathon and was extended to production, saving 6 hours weekly across the operations team.

### President and Founder

Artificial Intelligence Community

ai-community-sbu.github.io/AI-SBU

Nov. 2022 – May 2025

- Founded and led a club of 10 officers, growing membership to over 700 Discord members and coordinating events including a Kaggle competition with \$700 in prizes and a datathon with 50 participants and \$300 in prizes.
- Hosted weekly workshops for over 60 attendees covering machine learning concepts using slideshows and Jupyter notebooks.
- Facilitated 3 career events and 5 guest speaker sessions showcasing AI applications in industry and academia.

## PROJECTS

### Nexus

nexusbu.com

Aug. 2024 – Jun. 2025

- Collaborated with 3 developers to build a full-stack web application using Next.js, React, PostgreSQL, and TypeScript, providing Stony Brook students access to over 130 research opportunities across 6 departments.
- Attracted over 300 active users and achieved more than 30 daily site visits within the first 14 days of deployment.

### Flexy

devpost.com/software/flexy-and-i-know-it

Oct. 2024

- Developed a full-stack web app with 3 teammates that won the AllHealth track at HackHarvard 2024, helping users recover from injuries and arthritis through guided exercise routines.
- Implemented pose detection using OpenCV and MediaPipe to compare a user's live camera feed with 50+ reference images, ensuring proper form during recovery exercises.

### PBX Telephone Exchange Simulator

github.com/Shameed4/PBX-Server

Dec. 2024

- Developed a multithreaded TCP server in C on Linux to simulate a Private Branch Exchange (PBX) system, using POSIX threads and socket programming to handle concurrent client communication.
- Implemented a thread-safe state machine for telephone units (TUs) and synchronized shared data using semaphores.

### Hocus Potus

github.com/ritessshhh/Hocus-Potus-SBUHacks-2024

Feb. 2024

- Won Best Use of MongoDB Atlas at SBUHacks 2024 by building a gamified web app to quiz users on 2024 U.S. presidential candidates to promote political awareness.
- Utilized the OpenAI API to dynamically generate questions for 4 candidates and stored user feedback in MongoDB.
